*We are always working to improve our products and achieve the perfect design to ensure the safety and comfort of our clients. Follow us on our social media channels to stay up-to-date with our latest models!*

## Company profile

Dapro specializes in the development and manufacturing of Personal Protection Equipment for the petrochemical industry. Dapro is the premier flame retardant garment producer of the world. The product scope of Dapro consists of 5 product groups: Workwear, Outerwear, Base Layer, Footwear & Eyewear

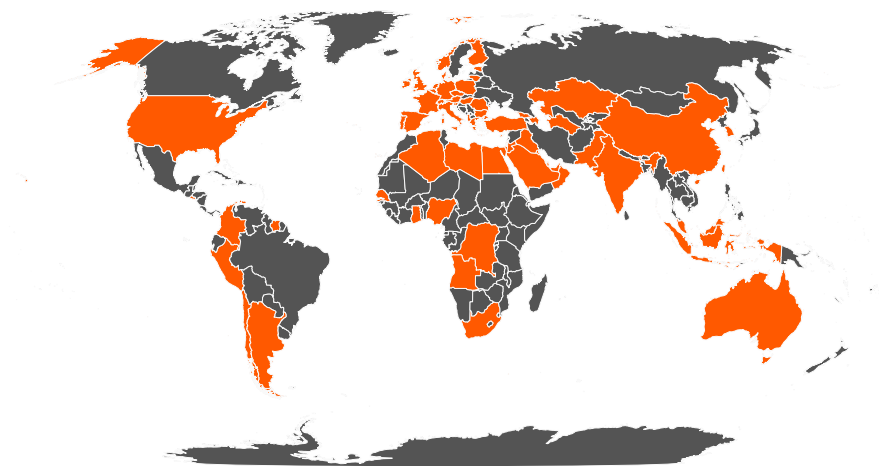

"Tailormade products are a specialty for which Dapro is well-known. With 'Dapro Tailor-Made Projects,' Dapro carefully listens to its users and creates products that cater to the needs and corporate identity of its clients."

Dapro's goal is to provide people working in hazardous environments with products that make their jobs safer. Innovation is central to Dapro, as is the continuous strive for highly durable, comfortable and protective products that exceed the standards of the industry.

The success of Dapro lies in combining these traits without compromise by using high tech materials and innovative design. The result is the use of Dapro products in 63 countries divided over 6 continents.

One example of the innovative features of Dapro is 'Dapro Action Armpits'. This innovative design gives the user the freedom to work comfortably above reach in a coverall (one-piece garment).

At Dapro your safety is the number one priority. Your life depends on it.  
For more information, please visit [www.dapro-safety.com](http://www.dapro-safety.com).

Dapro around the world

## Some of our customers

**Schlumberger**

**HALLIBURTON**

**Baker Hughes**

## Eco friendly manufacturing

Dapro has been a frontrunner in using eco-friendly materials and technology in its production processes. In our facilities, we take sustainability to the next level. Our facilities have rooftop energy sources. Solar power is a clean and efficient way of powering our production processes and lighting the facilities. In addition, Dapro uses low chromium content leather in its safety shoe production. Waste is reduced to a minimum in all our factories by means of stringent recycling policies. At Dapro we take sustainability as serious as we do safety.

### OEKO-TEX Standard 100

The OEKO-TEX® Standard 100 is an independent test and certification system for textile raw, intermediate and end products at all stages of processing. The test for harmful substances covers: Legally banned and controlled substances; Chemicals known to be harmful (but not yet legally controlled); Parameters for health protection. The more closely the product is in contact with the skin, the stricter the human ecology requirements are that it must meet.

With our exceeding parameters on breathability for higher comfort and durability Dapro is leading with returning happy customers all over the world.

## Flame-retardant Nano-Technology

A special Guardian® flame-retardant, breathable and waterproof membrane is attached to a Guardian® Polyester Outer Shell. A separate flame-retardant lining ensures a comfortable soft touch and warmth. It is possible to combine this construction with SubZero® insulation, which keeps the body dry and warm in even the most extreme conditions.

### Anti-static fabric technology

Guardian® anti-static fiber is a multi-filament bi-component yarn. Each filament has a unique conduction core surrounded by a sheath of fibers. It has been designed to provide optimal anti-static protection in grounded and ungrounded environments according to end-use specifications.

Most of our competitors supply anti-static garments which only comply to EN 1149-5. Dapro garments are certified and compliant to EN 1149-5 and to the most stringent anti-static standard called 'The Gasprobe Test'. This standard tests the garment in both ungrounded situations and real-world scenarios, such as standing in oil or being suspended by a fall arrest system.

## Quality testing and traceability

Each Dapro product must pass stringent quality and safety tests. Unlike most competitors who only test their products with a Notified Body for international certification, all Dapro products are officially certified by Notified Bodies and often exceed these standards. Our factories utilize, in addition to international certification testing, in-house laboratories where all materials and final products are continuously tested, to guarantee that every product meets both international and Dapro standards. See a list of some of our standard in-house tests below:

- > Water resistance and breathability of fabrics, leather, seams and garments
- > Fabric/leather elongation, tear and tensile strength
- > Leather chromium VI content and pH levels
- > Impact compression & perforation resistance on shoe hardware
- > Colour fastness
- > Shade variations
- > Shrinkage
- > Flame-retardant properties
- > Button pull testing
- > Pilling

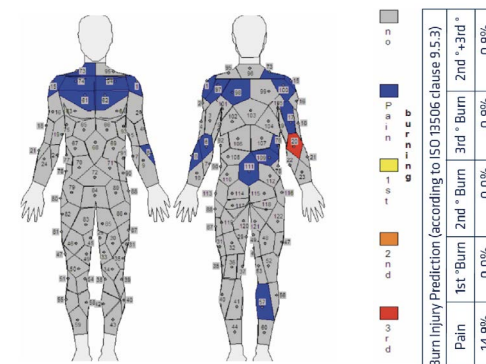

### Every Dapro product has a unique tracking code.

With this code we can see exactly which batch of materials was used and which employees were involved in the production of the product. This ensures accountability in our whole production process.

## Manikin Test

EN ISO 11612 is the international standard for industrial flame-retardant garments. EN ISO 11612 offers an optional test known as the 'Manikin Test'. This test involves exposing a manikin wearing our garment to a minimum 3-second flash fire. The test results predict the extent of skin burns for our product.

Dapro supplies the best flame-retardant garments in the world. That is why we do the 'Manikin Test' at 4 seconds and still achieve industry leading results. Please see the results in our burn injury prediction diagram.

# Certification information

Shop per standard at [www.dapro-safety.com](http://www.dapro-safety.com)

EN ISO 13688

Specifies various general performance requirements including ergonomics, size and marking of protective clothing and accompanying user info.

EN ISO 11612  
\*Classification\*

Specifies performance requirements for safety garments to protect from heat and flame, where there is a need for clothing with limited flame spread properties and where the user can be exposed to radiant, convective, contact heat or to molten metal splashes. Classifications:

- A = Flame distribution (A1 = Superficial flame, A2 = Peripheral flame)
- B = Convective heat (Class 1 - 3)
- C = Radiating heat (Class 1 - 4)
- D = Molten aluminium (Class 1 - 3)
- E = Molten Iron (Class 1 - 3)
- F = Contact heat (Class 1 - 3)

EN ISO 14116  
Index X

Specifies the performance requirements for the limited flame spread properties of materials, material assemblies and protective clothing in order to reduce the possibility of the clothing burning and thereby itself constituting a hazard. Protective clothing complying with this International Standard is intended to protect workers against occasional and brief contact with small igniting flames, in circumstances where there is no significant heat hazard and without the presence of another type of heat. Icon only shown when certified in combination with EN ISO 11612:2015. Index:

- 1: hole may be formed, no flame spread, no flaming debris
- 2: no hole formation, no flame spread, no flaming debris, after flame / glow time > 2s
- 3: no hole formation, no flame spread, no flaming debris, after flame / glow time < 2s

EN 1149-5

Specifies material and design requirements for electrostatic dissipative protective clothing, used as part of a total earthed system, to avoid incendiary discharges. The requirements may not be sufficient in oxygen enriched flammable atmospheres. This European Standard is not applicable for protection against mains voltages.

EN ISO 11611  
A1 Class X

Specifies safety requirements for protective clothing to be worn during welding and similar processes with comparable risks, to protect against spatter (small splashes of molten metal), short contact time with flame, radiant heat from the arc and minimizes the possibility of electrical shock by short-term, accidental contact with live electrical conductors in normal conditions of welding. (Class 1 - 2)

EN 13034  
Type X

Specifies the requirements for chemical protective clothing partial (Type PB [6]) or full body (Type 6), intended for use in cases of a potential exposure to a light spray, liquid aerosols or low pressure, low volume splashes and partial body protection.

EN 13758-2

This European Standard specifies the requirements for marking of clothing which are designed to offer the wearer protection against solar ultraviolet radiation exposure.

EN 343

Requirements and test methods for fabrics and seams of protective clothing against the influence of rain, snow, fog and ground humidity. Resistance to water penetration (A) and water vapour resistance (B) is measured.

A: Resistance to water penetration: 1-4, where class 4 provides the best waterproofness

B: Breathability – water vapour resistance: 1-4, where class 4 provides the best breathability

C: Impact from above with high energy droplets (optional)

EN 14058

This standard specifies the requirements and test methods for the features of garments for protection of the body against cold environments with temperatures above -5 °C.

A: Thermal resistance  $r_{ct}$  (class 1 - 3)

B: Air permeability (class 1 - 3) (optional)

C: Water vapour permeability (optional)

D: Resistance water penetration (class 1 - 2) (optional)

IEC 61482-2  
Class X

Specifies the necessities and test methods applicable to materials and garments for protective clothing for electrical workers against the thermal hazards of an electric arc based on properties of the textiles tested with selected test methods.

The arc rating of materials (ATPV or EBT50) when tested with an open electric arc under defined laboratory conditions according to IEC 61482-1-1.

The arc protection class of materials and garments (Class 1 or Class 2), when tested with a directed and constrained electric arc under defined laboratory conditions according to IEC 61482-1-2 requirements of this standard do not address electric shock hazards. The present standard is applicable in combination with standard covering such hazards.

IEC 61482-2  
Class X

EN ISO 20471

This standard specifies the international standard for the safety requirements and test methods of hi-vis workwear, and is applicable to high-risk situations. It specifies requirements for “high visibility clothing which is capable of visually signalling the user’s presence” and assesses the suitability and durability of retro-reflective materials. (Class 1 - 3)

EN 17353  
Type X

This European standard specifies the requirements for enhanced visibility equipment in the form of garments, or devices, which are capable of visually signalling the user’s presence. The enhanced visibility equipment is intended to provide conspicuity of the wearer in medium risk situations under any daylight conditions and/or under illumination by vehicles headlights or searchlights in the dark.

ISO 20345

Specifies basic and additional (optional) requirements for safety footwear used for general purpose. It includes, for example, mechanical risks, slip resistance, thermal risks, ergonomic behaviour.

EN 166

Specifies the core technical industrial safety norm in Europe for eye protection applying to all types of individual protection of the eye which protects from hazards likely to damage the eye, except for nuclear radiation, x-rays, laser emissions and infrared emitted by low temperature sources.

Guardian Lifetime Flame Retardant

- 80% Cotton / 19% Polyester / 1% Anti-static
- Flame-retardant and Anti-static
- Chemical proof
- 350 GSM

FR

## Features

- > Suitable for Continental climate
- > Elastic braces with buckle closure
- > **Zipper fly** closure
- > Chest pocket with safety flap and double concealed metal snap button closure
- > Elastic waistband for improved fit
- > Slanted side pockets with safety flap and plastic flame-retardant snap button closure
- > **Side vents** with metal snap button closure behind side pockets
- > Back pockets with fabric reinforcement, safety flap and concealed metal snap button closure
- > **Cargo pocket** with safety flap and double concealed metal snap button closure at left hand side leg
- > **Diamond tool pocket** with safety flap at right hand side leg
- > **Kneepad pockets** with triple hook-and-loop adjustment
- > Extendable hems (5cm)
- > Reflective piping details on back pockets and cargo pocket
- > Prolux® 50mm flame-retardant reflective striping

# prolux<sup>®</sup>

adapts brilliantly

**Prolux** reflective striping is specifically developed for industrial **workwear** and **outerwear**.

**Visibility** in dark and hazardous environments greatly reduces the risk of accidents. This can be on railways, roads, construction areas or industrial areas.

Aside from its **exceptional** reflective properties, our product offers great **durability** with **industrial** laundering

## Retro-reflective

450 cd/lx m<sup>2</sup> @ Observation Angle 12° / entrance angle 5°

## Composition:

Glass bead 30% / Resin 30% / Highly durable FR backing cloth 30% / Other materials 10%

## NFPA 1971

NFPA 1971 protects fire fighting personnel by establishing minimum levels of protection from thermal, physical, environmental, and bloodborne pathogen hazards encountered during structural and proximity fire fighting operations.

## OEKO-TEX<sup>®</sup> Standard 100

If a textile article carries the STANDARD 100 label, you can be certain that every component of this article, i.e. every thread, button and other accessories, has been tested for harmful substances and that the article therefore is harmless for human health.

[www.prolux-reflective.com](http://www.prolux-reflective.com)

## Certificate Standards

### EN 20471:2013

This standard specifies the international standard for the safety requirements and test methods of hi-vis workwear, and is applicable to high-risk situations. It specifies requirements for "high visibility clothing which is capable of visually signalling the user's presence" and assesses the suitability and durability of retro-reflective materials.

### EN 469:2005

This standard specifies minimum levels of performance requirements for protective clothing to be worn during firefighting operations and associated activities such as e.g. rescue work, assistance during disasters.

### EN ISO 14116:2008

This standard specifies the minimum requirements for protective clothing against heat and flame. The standard outlines the performance requirements for clothing materials and garments that are designed to protect against limited flame spread and radiant heat.

### EN ISO 11612

This standard outlines the performance requirements for clothing materials and garments in terms of their ability to resist heat and flame, and to provide effective protection for the wearer. EN ISO 11612 specifies test methods for determining the clothing's ability to resist heat and flame, as well as requirements for the material's strength and dimensional stability.

# SUBZERO<sup>®</sup>

## INSULATION

**SubZero** insulation is an intermeshed cotton material which forms a mass of fiber to trap air in between the outerlayer of the shoe and your foot.

This **breathable high resilient** and **loft** material provides **durable warmth** retention with **light weight** properties for extra **freedom of movement** and **comfort**.

*The perfect combination to use in protective workwear developed to work in hazardous environments.*

# prolux<sup>®</sup>

adapts brilliantly

**Prolux** reflective striping is specifically developed for industrial **workwear** and **outerwear**.

**Visibility** in dark and hazardous environments greatly reduces the risk of accidents. This can be on railways, roads, construction areas or industrial areas.

Aside from its **exceptional** reflective properties, our product offers great **durability** with **industrial** laundering

## Retro-reflective

450 cd/lx m<sup>2</sup> @ Observation Angle 12° / entrance angle 5°

## Composition:

Glass bead 30% / Resin 30% /  
Highly durable FR backing cloth  
30% / Other materials 10%

## NFPA 1971

NFPA 1971 protects fire fighting personnel by establishing minimum levels of protection from thermal, physical, environmental, and bloodborne pathogen hazards encountered during structural and proximity fire fighting operations.

## OEKO-TEX<sup>®</sup> Standard 100

If a textile article carries the STANDARD 100 label, you can be certain that every component of this article, i.e. every thread, button and other accessories, has been tested for harmful substances and that the article therefore is harmless for human health.

[www.prolux-reflective.com](http://www.prolux-reflective.com)

## Certificate Standards

### EN 20471:2013

This standard specifies the international standard for the safety requirements and test methods of hi-vis workwear, and is applicable to high-risk situations. It specifies requirements for "high visibility clothing which is capable of visually signalling the user's presence" and assesses the suitability and durability of retro-reflective materials.

### EN 469:2005

This standard specifies minimum levels of performance requirements for protective clothing to be worn during firefighting operations and associated activities such as e.g. rescue work, assistance during disasters.

### EN ISO 14116:2008

This standard specifies the minimum requirements for protective clothing against heat and flame. The standard outlines the performance requirements for clothing materials and garments that are designed to protect against limited flame spread and radiant heat.

### EN ISO 11612

This standard outlines the performance requirements for clothing materials and garments in terms of their ability to resist heat and flame, and to provide effective protection for the wearer. EN ISO 11612 specifies test methods for determining the clothing's ability to resist heat and flame, as well as requirements for the material's strength and dimensional stability.

# SUBZERO<sup>®</sup>

## INSULATION

**SubZero** insulation is an intermeshed cotton material which forms a mass of fiber to trap air in between the outerlayer of the shoe and your foot.

This **breathable high resilient** and **loft** material provides **durable warmth** retention with **light weight** properties for extra **freedom of movement** and **comfort**.

*The perfect combination to use in protective workwear developed to work in hazardous environments.*

## Size guide Footwear

### SHOE LENGTH (A)

EU	35	36	37	38	39	40	41	42	43	44	45	46	47	48
UK	2	3	4	4½	5½	6	6½	7½	8½	9	10	11	12	13
USA	3½	4	5	5½	6½	7	7½	8½	9½	10	11	12	13	14
IN	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Mondopoint	217	225	232	240	247	255	262	270	277	285	292	300	307	315

### SHOE WIDTH (B)

EU	35	36	37	38	39	40	41	42	43	44	45	46	47	48
D	83	85	87	89	91	93	95	97	99	101	104	106	108	110
E	86	88	90	92	94	96	98	100	102	104	106	109	111	113
EE	88	90	92	95	97	99	101	103	105	107	109	112	114	116
EEE	91	93	95	97	99	102	104	106	108	110	112	114	117	119
EEEE	93	95	97	99	102	105	107	109	111	113	115	117	120	122

### Length (A)

Foot width (B) is measured with the subject standing barefoot and the weight of the body equally distributed on both feet. The size of the left and right foot is often slightly different - in this case measure both feet and the shoe size is based on the larger foot.

Mondopoint is based on the mean foot length (A) for which the shoe is suitable, measured in millimeters. The width of a foot (B) is also measured in millimeters.

When establishing your size, base it on your largest measurement.

## Features

- > This Dapro ergonomic insole is comfortable and suitable for all Dapro safety shoes / work shoes.

Available colors and sizes:

Navy Blue \*NB

EU 35-48

# Dapro Various Laces

## Dapro Round Brown Laces

PRODUCT CODE: 01-05-002

### Features

- > Sold in pairs
- > Perfect for use in:
  - Dapro Baron S3 C
  - Dapro Noble S3 C
- > Length: 130cm
- > Type: Round

Available in colors:

Brown \*BR/BR Black \*BL/BL

## Dapro Round Black Laces

PRODUCT CODE: 01-05-003

### Features

- > Sold in pairs
- > Perfect for use in:
  - Dapro Baron S3 C
  - Dapro Noble S3 C
- > Length: 130cm
- > Type: Round

## Dapro Flat Brown Laces

PRODUCT CODE: 01-05-018

### Features

- > Sold in pairs
- > Perfect for use in:
  - Dapro Dauntless S3 C
  - Dapro Dauntless S3 C Subzero® Fur
- > Length: 130cm
- > Type: Flat

## Dapro Flat Black Laces

PRODUCT CODE: 01-05-016

### Features

# Dapro Elements 1 C S3 C

PRODUCT CODE: FELE1CS3C-BR/BR\*

## Certification and Information

HR1CS3C					
		Oil	★★★★★	Traction	★★★★★
		Heat	★★★★★	Comfort	★★★★★
		Chemical	★★★★★	Non-marking	★★★★★ ✓
		Abrasion	★★★★★		
EN ISO 20345:2022	F2413-18				
S35 FO SR HRO SC	M/I/C				
EN 61340-5-1:2016	SD10/PR				
ESD	F3445-21				
	SR				

## Features

- > Metal free
- > Full grain leather upper
- > Abrasion resistant material used in the collar
- > Lace-up system for secure fit
- > TPU Abrasion resistant cuff nose / scuff cap
- > Anti-perforation textile mid plate (APT)
- > Composite toe cap
- > Anti-bacterial polyester mesh lining and 3D EVA insole
- > Reinforced heel support structure for extra support and durability
- > Slip resistant sole
- > Oil resistant sole
- > Heat resistant sole up to 300 degrees Celsius
- > Anti-static ESD PU/Nitrile Rubber sole for comfort, durability and light weight
- > Minimum order quantity of 400 pieces

Available on request:

Black \*BL/BL EU 37-48

Brown \*BR/BR EU 37-48

Anti-Perforation Midsole

Anti-Static Sole

Anti-Slip Sole

Anti-Shock Heel

Water Resistant Leather

Hydrocarbon Resistant Sole

Breathable Leather

Protective Toe Cap

# SUBZERO<sup>®</sup>

## INSULATION

**SubZero** insulation is an intermeshed cotton material which forms a mass of fiber to trap air in between the outerlayer of the shoe and your foot.

This **breathable high resilient** and **loft** material provides **durable warmth** retention with **light weight** properties for extra **freedom of movement** and **comfort**.

*The perfect combination to use in protective workwear developed to work in hazardous environments.*
